

# Timber Venetian Blind Colour Selector

## Fibrewood 50mm

Used as an economical alternative to timber in our Venetian Blind range, Fibrewood is made from expanded foam polymer with a special UV fade resistant coating. Fibrewood is fade resistant and resists peeling and cracking. Completely washable, this product will not absorb moisture and is suitable for wet and humid areas including bathrooms and kitchens.

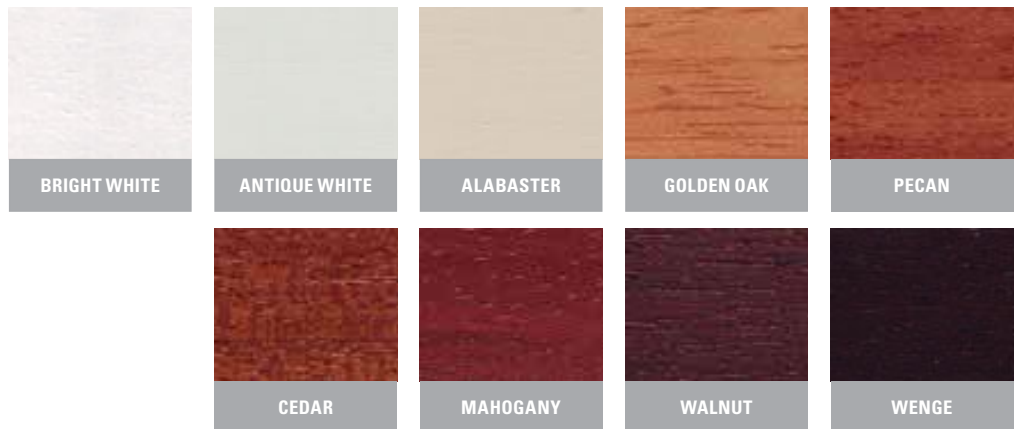

## Fibrewood 65mm

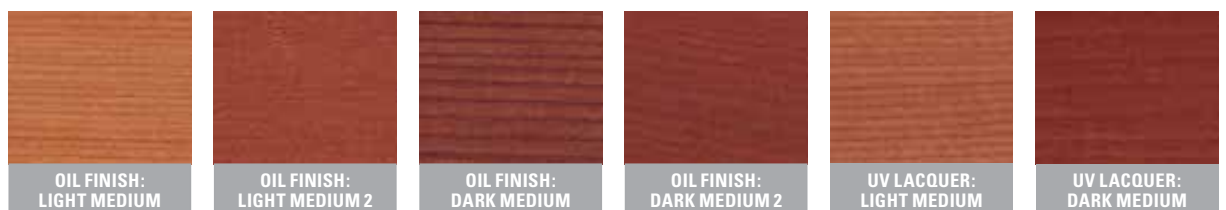

## Timberline 50mm

Vertilux Timberline Venetian Blinds are made from 3mm thick Abachiwood in a range of pre-finished colours. They complement contemporary as well as period and heritage homes, adding warm, natural texture to any interior space.

## Cedarline 46mm, 60mm & 84mm

Vertilux cedar is aerated and naturally dried prior to manufacture, increasing its attractiveness and durability. It exceeds Australian standards for colourfastness and fade resistance. To highlight the natural grain the latest in UV fade resistant oil and lacquer are used, and then the slats are evenly graded and vacuum coated in a single pass to ensure all four sides of each slat have a completely even finish.

PLEASE NOTE: Material details and their colourways may not appear true to colour or scale due to the nature of the media. Samples can be forwarded on request to your representative or by emailing [web@vertilux.com.au](mailto:web@vertilux.com.au)
